

Training content for today's modern classroom

Provision brings you Logical Operations — a single-stop provider of Instructor-Led Training (ILT) solutions for top IT certification programmes such as Adobe and Linux Professional Institute (LPI). Regardless of whether your training organisation needs traditional print for in-person instruction, a digital solution for virtual classrooms or you want to extend your student's learning experience beyond the classroom; Logical Operations provides purpose-built content and solutions that help you differentiate yourself in the market and create additional revenue opportunities.

More than 4,600 titles. Six major skill areas:

- User Productivity
- Networking & Security
- Design & Media
- Web Development & Mobile Programming
- Project Management
- Workplace Skills

The logical choice — with greater benefits for your students:

- A modern, tile-based, central location for classroom resources
- Lifetime content access: anytime, anywhere, on any device
- Content solutions that extend learning beyond the classroom

Offer the best student learning experience available.

Logical Operations' premier product line, CHOICE, offers your training organisation traditional print courseware and supporting electronic components. Exclusive to CHOICE is a configurable content delivery platform that deploys additional electronic assets for students.

Learning is a highly personal experience — no two people learn in precisely the same way. The best results are attained when the learning experience is tailored to the method that is most effective for each student. This is the basis for Logical Operations' curriculum design — transformative, multi-modal courses that let students work in a way that best suits their needs.

The patent-pending CHOICE learning platform is configurable and combines award-winning curriculum with an interactive, intuitive, multi-platform learning experience. This innovative approach incorporates the many components of the learning experience — video tutorials, peer-based learning through communities, checklists, and progress assessments amongst other features. The comprehensive learning features are configurable so that students can design their out-of-class learning to match the way they most effectively absorb, retain and apply the material.

Logical Operations CHOICE learning system features:

- Print courseware (optional)
- eBooks
- Assessments
- Supporting exercise files and PowerPoint presentations
- LearnTO video content
- Checklist “how-to” procedure references
- Social learning communities
- Mobile applications for content access (CHOICE mobile apps)
- Office.com videos
- CertBlaster preparation
- Sonic video instruction
- LogicalGUIDE hard-copy quick reference cards
- CustomCHOICE customizable content
- Remote software environments (LogicalLABS, for select titles)
- Learning platform configuration (by class or course)
- Future availability of additional tiles
