

Prepare your students for certification with Microsoft Official Practice Tests

Microsoft Official Practice Tests, powered by MeasureUp, provide critical, customized assessment and remediation to help candidates gain confidence, master technical content and make the best use of their certification preparation time.

The only Microsoft Certified Professional practice tests endorsed by Microsoft

- Pearson VUE and MeasureUp work closely with Microsoft to verify practice tests closely align with certification exams
- Continually updated content assesses knowledge and skills using the latest technologies from Microsoft
- Practice tests are available through multiple channels – giving test centres flexibility to purchase exam preparation materials using traditional procurement methods

What are you waiting for?

Feature-rich practice exams

Pearson VUE practice tests are available in the classroom, online or offline, to allow students maximum convenience while measuring preparedness and identifying opportunities for improvement. With complete coverage of exam objectives and comprehensive explanations, instructors can:

- Plan training and place students according to skill level
- Provide additional study tools and resources
- Utilise in-depth reporting features
- Track learning and show progress through pre- and post-assessment

“Our goal is to provide MCPs and candidates with a full solution from preparation to examination, and Pearson VUE’s portfolio of practice tests is an additional preparation tool to aid in their certification success.”
