Get certified. Get recognized. Get hired!

Microsoft certification helps you rise above the competition

As the demand for IT professionals increases, standing out from the competition takes even greater effort. IT training and certification help you solve that problem – leading to career advancement, a better salary and respect from managers and peers.

Microsoft Certifications are among the most well-respected credentials in the IT industry. They prove your ability to step into a critical IT role and get the job done. That's why hiring managers worldwide look for Microsoft Certifications when evaluating candidates – they know that a Microsoft Certified Professional (MCP) has what it takes. Whether you're looking to gain a competitive advantage or just honing your skills, Microsoft Certifications provide a fast track to career success.

Security...database...mobility...cloud computing: Whatever IT role you want to master, certifications from Microsoft can help you get there.

Microsoft Certified Professional

Ask about MCP training & certification!

Microsoft Certified Solutions Associate (MCSA)

MCSA certification provides the core technical skills required to prove to hiring managers that you are ready to hit the ground running and build a sustainable career in IT. MCSA certifications are a prerequisite to the MCSE expert-level certifications and are available for the following Microsoft products:

Windows Server 2008 and 2012	SQL Server 2012
Windows 7, Windows 8, Windows 10 (coming soon)	Office 365

Microsoft Certified Solutions Expert (MCSE)

MCSE credentials help you validate and demonstrate your ability to build innovative solutions across multiple Microsoft technologies; both on premise and in the cloud. Learn more about the following MCSE certifications:

Server Infrastructure	Messaging	Enterprise Devices and Apps
Desktop Infrastructure	Communication	Data Platform
Private Cloud	SharePoint	Business Intelligence

91%

of hiring managers consider certification as part of their hiring criteria.

Microsoft Technology Associate (MTA)

The MTA is an introductory Microsoft certification for individuals considering a career in technology. Start here to validate fundamental technology concepts. Tracks include:

IT Infrastructure	Database	Developer

The benefits of Microsoft professional certification

Passing a qualifying exam allows you to join a community of millions of MCPs and have access to networking, forums, customized resources and other MCP benefits. Becoming an MCP is the first step to achieving even more distinguished credentials including Microsoft Certified Solutions Expert (MCSE) and Microsoft Certified Solutions Developer (MCSD).

Your MCP certification may earn you college credit! The American Council on Education (ACE) has made a recommendation for college credit for select Microsoft exams. More than 2,000 higher education institutions consider ACE credit recommendations for awarding college credit. Learn more at ACEnet.edu.
